

The Leighton McGin Effectively Resolves Their Noise Control Issue....

THE PROBLEM:

Even the biggest noise problems, can be treated with just a simple solution. Leighton McGin Company had similar problems. Noise was traveling through one door way.

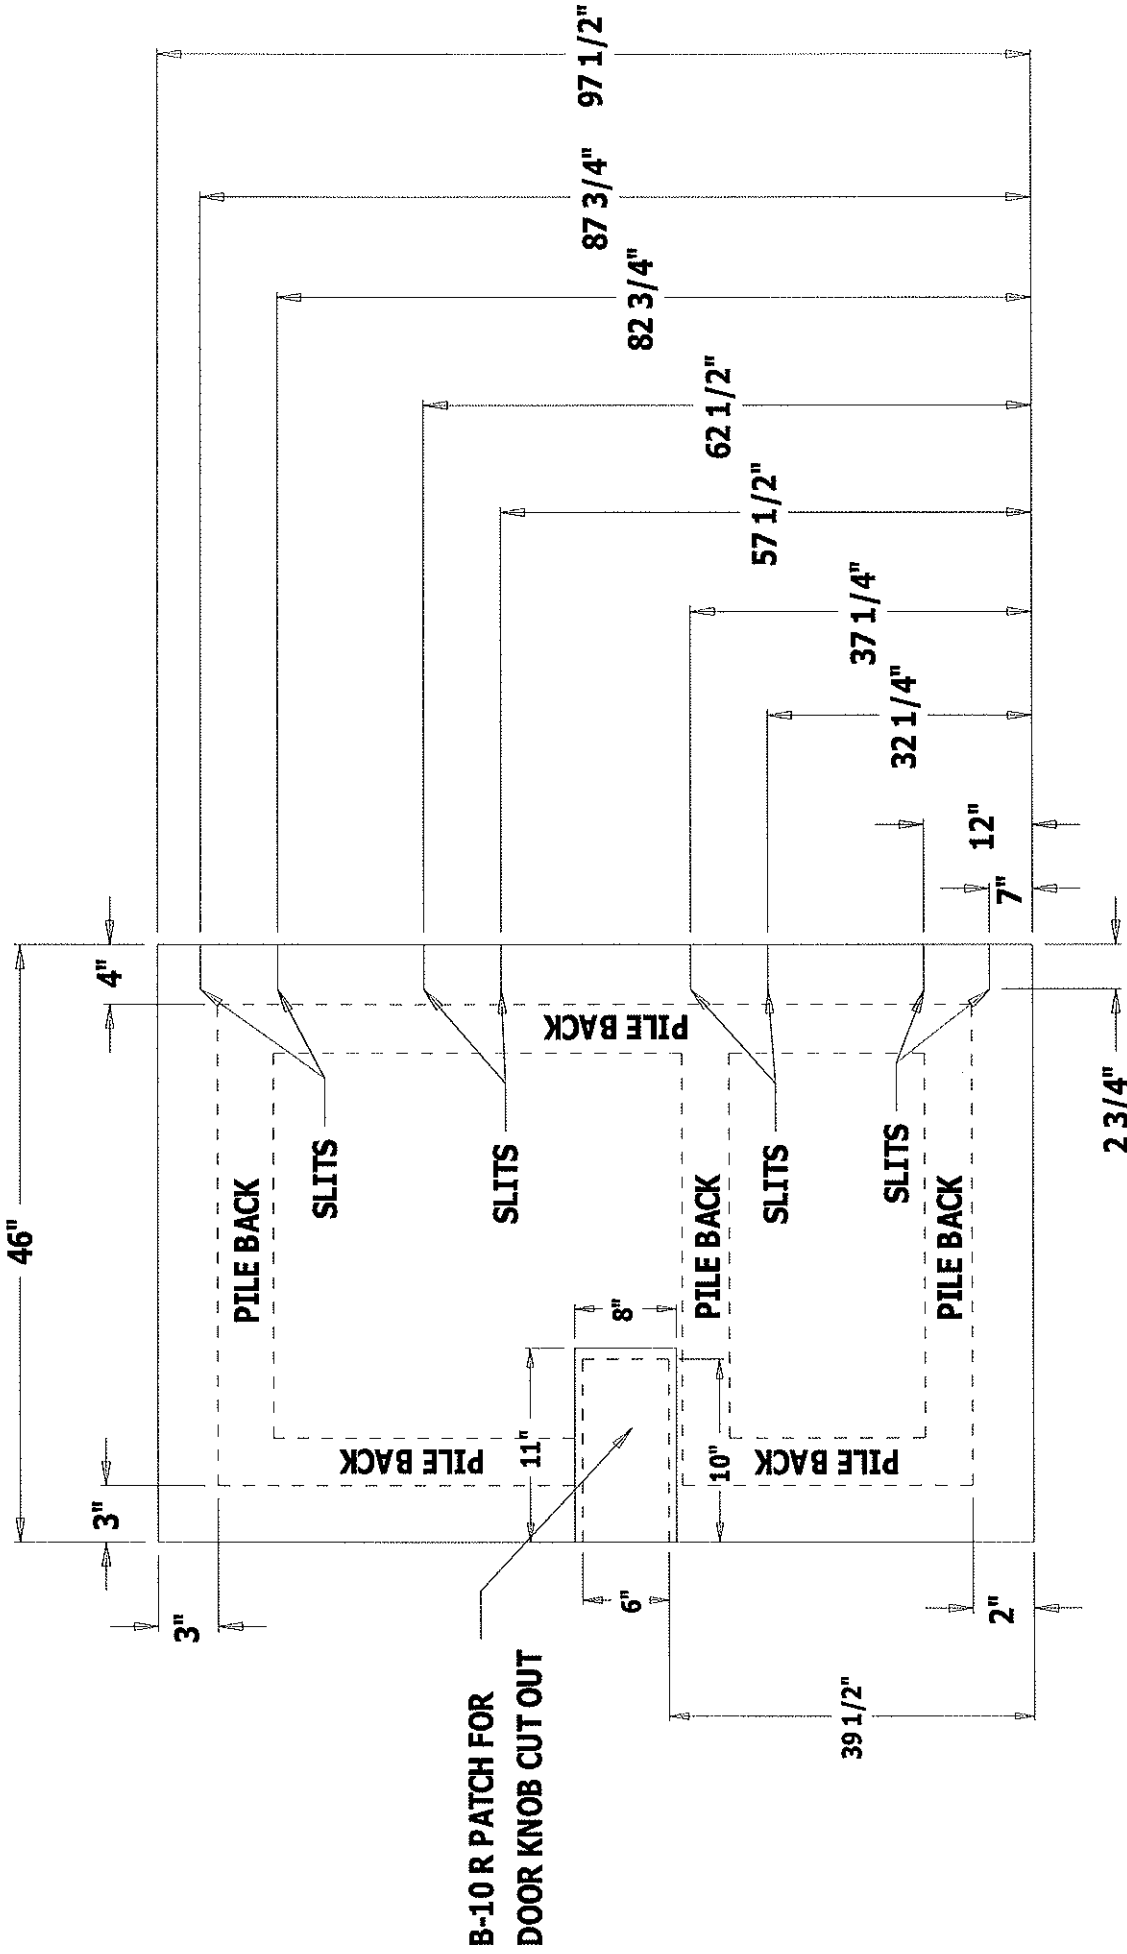

THE SOLUTION:

Upon contacting All Noise Control we showed them the options and acoustic properties of our ANC-AB2DC - Quilted Fiberglass Door Panel. Their custom sizes with hinges and variations of door handle and key holes were a simple, cost effective solution. Our ANC-AB2DC blanket was trimmed and finished to their doors measurements and was installed quickly.

THE RESULTS:

Immediately the noise was quieted and a healthy, productive level of quiet spread through the facility. Our quilted fiberglass door blankets steadily achieve STC ratings of 29 and coupled with other noise absorption and barrier products can control even the loudest of noises.

We invite you to call All Noise Control at 561-964-9360 to discuss the noise control materials supplied to this particular environment and are just as happy to listen to your individual needs and supply you with a customized All Noise control solution.
