

QVC Remote Production Effectively Resolves Their Outdoor Noise Issue....

The problem:

QVC Remote Productions was experiencing some outdoor noise issues near their hotel project. With too many simultaneous noise issues occurring at once they needed to control this issue at a rapid rate. With little or no blocking potential QVC had to fix this problem fast.

The Solution:

All noise control provided sound advice with an easy to install, incredibly effective sound proofing material solution [ANC-AB110EXT-N](#) outdoor acoustical blanket.

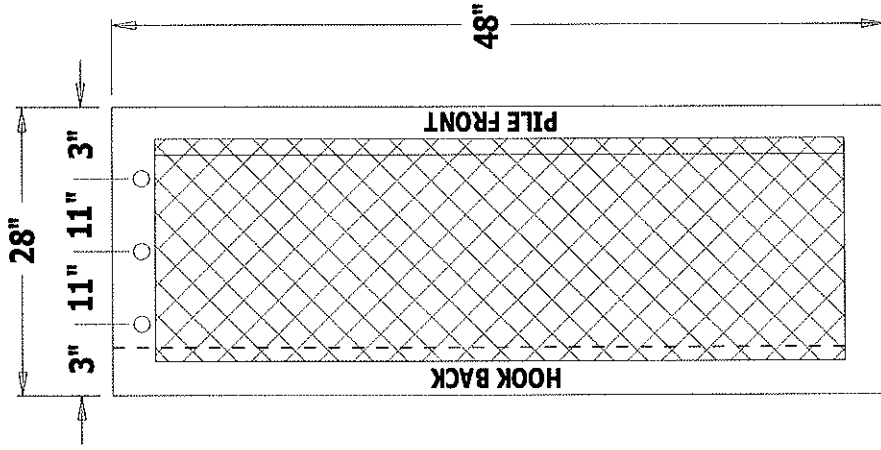

QVC provided the dimensions needed, with that we were able to provide our short term outdoor solution [ANC-AB110EXT-N](#). This material is heavy duty VCP faced quilted 1" thick fiberglass and a 1# non-reinforced loaded vinyl barrier. Finished with grommets, and heavy duty exterior grade Velcro lining the vertical edges. The all noise control solution improves on higher DB loss for outdoor applications.

By using this exterior grade material, any sound waves and or noise remaining were prevented from bouncing repeatedly off walls.

With multiple soundproofing materials provided, all noise control managed to completely dissipate the sound waves created by the hotels outside noise, by blocking and absorbing it.

We invite you to call all noise control at 561-964-9360 to discuss the soundproofing materials supplied to this particular outdoor application and are just as happy to listen to your individual needs and supply you with a customized all noise control solution.
