

# The Imerys Inc Effectively Resolves Their Soundproofing Issue with Soundproofing Blankets....

### THE PROBLEM:

Imerys Inc in Ludlow, VT was experiencing serious noise issues, and came to us to provide a solution for an area measuring 576 SF.

According to custom specifications they had requested 18 panels measuring 48" x 96" High, with top grommets only and no Velcro. We recommended our indoor acoustic blanket panels. We sent our CAD department the dimensions provided, and based off their custom specifications we were able to provide a solution.

### THE SOLUTION:

ANC\_AB12 blanket material for the 576 SF areas. This material is our 2" vinyl faced quilted fiberglass on both sides with 1# non-reinforced barrier in the middle. Top grommets only and no mating vertical Velcro. The objective was to cover their area with our material, to give an overall STC rating of 29, which would reduce the DB rating by 15-20 decibels. All Noise Control provided sound advice with an easy to install, incredibly effective multi soundproofing material solution.

### THE RESULTS:

With the soundproofing materials provided, All Noise Control managed to completely reduce the sound. This made the environment more productive, and cost-effective.

We invite you to call All Noise Control at 561-964-9360 to discuss the noise control materials supplied to this particular environment and are just as happy to listen to your individual needs and supply you with a customized All Noise control solution.
