Be it improved acoustics for theater, broadcasting & audio or churches or blocking noise in industrial plants, heavy construction sites, outdoor enlarge applications and others to many to list. They are sure that with our variety of acoustical materials, in multiple colors, shape and size options tailored to fit your needs.

Challenge:

Powertech Interiors contacted All Noise Control; they need to find a product that reduces sound from transmitting through walls, floors, and ceiling. As well as soundproofing an existing spaces. Powertech Interiors felt 100% confident that their decision to use All Noise Control was the right decision.

Goal:

The main goal for All Noise Control was to find the ideal product for Powertech Interiors. That consists with their request, reduces sounds from transmitting through walls, floors, and ceilings. As well as soundproofing an existing spaces.

Solution:

All Noise Control explain to Powertech Interiors about a product that could do the job. The product is the Acoustical Vinyl Sound Barrier. This product has a high-density thin, weighted barrier, constructed of non reinforced high temperature fused vinyl with no lead filters. Weighs one pound per square foot and is 1/8. thick. Apply to block transmission of sound through walls, floors, and ceilings. Also effective as a pipe and duct wrap to damper vibrations and reduce noise. Also available in a reinforced version designed to sustain its own vertical weight for suspension

Success:

Our Client, Powertech Interiors order that product and install the product, the result of the product was amazing, they were very pleased with the results. The Acoustical Vinyl Sound Barrier was the ideal product.
