

CASE STUDY

INDUSTRIAL STRENGTH ACOUSTIC MACHINERY ENCLOSURES

Caterpillar Inc, the industrial of all industrial Turns to All Noise Control to supply them with industrial acoustic solutions. Heavy machinery is an understatement when referring to Caterpillar Inc, a world-wide company producing world-class industrial machinery & equipment. At the corporate offices in Morton IL, Caterpillar Inc experienced some acoustic problems that are incredibly common in manufacturing of machinery and equipment. They needed to isolate unhealthy noise levels from machines in their facility.

Using All Noise Control's popular industrial strength acoustic blanket, ABI, Caterpillar Inc. was able to quickly fabricate an industrial acoustic enclosure that prevented the equipment from distributing unhealthy noise. The successful implementation of our products resulted in a quieter facility which also includes the positive effects of improved work conditions. These conditions create a healthier work place which always peaks productivity and general demeanor.

All Noise Control has a full line of industrial acoustic products related to the acoustic blankets and curtains that industrial facilities are always in need of. We suggest that you look for our Industrial Acoustic Blanket & Curtain Systems here or visit our Acoustic Blanket Portable Enclosures for applications requiring more portable flexible applications. We also have a unique product that is an acoustic blanket door panel that helps reduce noise traveling through doors which are usually a bit more susceptible to transmit noise due to their materials. Whether an industrial plant, a manufacturing or treatment facility, heavy construction or any industrial applicaiton, All Noise Control has the industrial acoustic materials, hardware and adhesives to get the job done and eliminate your noise problems
