

## CASE STUDY

### OUTDOOR ACOUSTIC BLANKETS FOR MINING TECHNOLOGY

Drummond has an impressive history of developing and acquiring new sources of production, implementing new mining technology, and opening new markets for its products. The company began in 1935 with the vision of H.E. Drummond, an entrepreneur who made the decision to enter the coal business in his native Sipse, Alabama.

All Noise Control supplies and custom manufacturers a wide variety of cost effective, high performance acoustical products for noise control in commercial, industrial, institutional markets as well as other specific markets like Houses of Worship.

All Noise Control discuss with Drummond Company, Inc and came to a conclusion with what product would be best. The product that would be best would be the ANC-AB110EXT- R2. This product is a sound absorber and used for an outdoor application. Which means that it is UV resistant, and had a maximum durability.

This product is typically use as modular curtains on long – term construction or just a permanent outdoor application such as enclosing HVAC equipment. This product is two inch thick, vinyl coated polyester faced one-inch quilted fiberglass and one pound per square foot reinforced loaded vinyl barrier. This will help sound absorb.

Drummond Company, Inc was extremely thrilled with the results of the product. The ANC – AB110 EXT-R2 Sound Curtains, with this product they can now work in the peaceful environment.
