

SOUNDPROOF DOOR COVER PANEL

All Noise Control's Acoustical Door Cover Panels are designed to be attached to any existing door to significantly improve the sound transmission loss ability of the door and its frame. Acoustical door cover panels overlap the door and extend beyond the frame to prevent acoustical leaks. They have a cut out for the door handle, slits to fit around the hinges, and Velcro is sewn onto the back for quick and easy installation.

- Class A (or 1) Flammability Rated per ASTM E84
- Available colors: gray, white, black, or tan

Applications:

Typically used to complete the acoustical treatment of a room by addressing the leaks that a traditional door presents. Windows can be installed on the door panels, at required locations, to offer an unobstructed view of traffic entering and exiting the door.

US Coast Guard solves noise traveling through doors with our ANC-AB2DC. Learn more about how they were pleased with this product:

US Coast Guard Effectively Resolves Their Noise Control Issue of Noise Travelling Through Double Doors....

THE PROBLEM.

Significantly reduced by treating doorways and openings. The US Coast Guard facility in Kent, WA had similar problems. The noise was traveling through a manufacturing area into office corridors with constant noise interruptions.

THE SOLUTION.

Upon contacting All Noise Control we showed them the options and acoustic properties of our ANC-AB2DC Quilted Fiberglass Door Panel. Standard or custom sizes with windows and any variation of door handle and keyholes were a simple, cost-effective solution. Our ANC-AB2DC blanket was trimmed and finished to their double door measurements and was installed quickly.

THE RESULT.

Immediately the noise was quieted and a healthy, productive level of quiet spread through the facility. Our quilted fiberglass door blankets steadily and achieves STC ratings of 29 and coupled with other noise absorption and barrier products can control even the loudest of noises

Visit our Acoustic Blanket page to see the wide selection of products or visit our Acoustic Door Cover page for product specifications.

We invite you to call All Noise Control at 561-964-9360 to discuss the noise control materials supplied to this particular installation or to address any of your noise control issues. We would be happy to listen to your individual needs and supply you with a customized All Noise Control Solution.
