

# CLEANROOMS

## MODULAR HARDWALL DESIGNS UP TO CLASS 1,000

The need for a cleanroom can often feel overwhelming, but All Noise Control is here to help simplify the process. The panels, windows, and doors from our in-plant modular office system are already designed to meet your Class 1000, Class 10,000, and Class 100,000 standards. Our knowledgeable sales team can seamlessly integrate our wall system with the necessary cleanroom components to ensure your cleanroom meets all of your specific requirements.

Cleanrooms by All Noise Control feature a hidden return air chase system. By using the wall cavity along with appropriately sized return louvers, All Noise Control eliminates the need for costly ductwork and chase walls commonly found in hardwall modular cleanroom systems. This results in a more aesthetically pleasing, cost-effective, and easier-to-install final product.

### WE WILL WORK DIRECTLY WITH YOUR SUBCONTRACTORS.

Already have a mechanical contractor?  
No problem. All Noise Control will  
provide your contractor with the  
necessary information to properly  
design and supply your HVAC system.
