Fire Engine Red

39/10100
Sky White

Common Applications

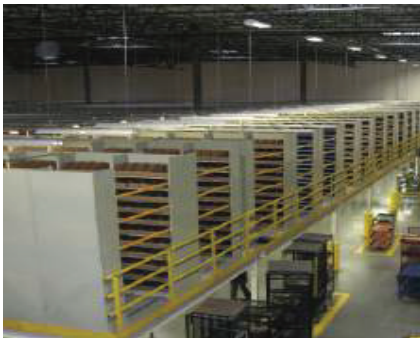

Catwalks

Sports Facilities

Observation Offices

Storage Areas

Range Towers

Aerospace Applications

Standard Decking Options

- **Advantech** - A high-quality alternative to plywood and OSB, offering enhanced strength, stiffness, and moisture resistance.
- **ResinDek** - A durable, high-density composite flooring designed for mezzanines supporting heavy loads such as pallet jacks, carts, and dollies.
- **Diamond Plate** - A robust steel decking option, second in durability only to concrete.
- **Concrete Flooring** - The most durable mezzanine flooring available, ideal for heavy-duty applications.
- **Press-Locked Grating** - Steel grating (also known as bar grating) is widely used in industries such as waste management, mining, and food service.
