

BETTER BUILT
STRONGER BUILT
ALL NOISE CONTROL

An All Noise Control ballistic building is constructed with a heavy-duty welded steel frame reinforced with ballistic-rated steel sheeting. These structures are ideal for gatehouses, guard booths, and security buildings. Each ballistic-rated building includes a fully welded steel base, allowing for easy transportation via forklift or crane.

Ballistic Rated Modular Buildings

- UL and NIJ-certified ballistic protection at all levels
- Durable steel base designed for easy forklift and crane transport
- Integrated lightning protection, PA systems, and advanced security features

- Available in a variety of sizes and customizable color options
- Tailor-made to meet your specific application and security needs

- Fully insulated and weatherproof, equipped with HVAC systems for climate control
- Available in shed, gable, or hip roof designs to match your facility's aesthetics
