

ACOUSTICAL FABRICS

Enhancing Soundproofing in a Florida Recording Studio with Acoustical Fabrics

A music recording studio in Tampa, Florida needed to eliminate sound reflections and external noise interference. The studio required high-performance acoustical fabrics to achieve a controlled recording environment. All Noise Control provided a tailored solution using premium sound-absorbing fabrics.

Solution

- **Product Used:** Fabric-wrapped polyester panels with an NRC rating of 0.90.
- **Material:** Fire-resistant and durable polyester fabric, compliant with ASTM E84 Class A.
- **Installation:** Panels were mounted on walls and suspended from the ceiling in high-noise areas.

Results

- **Enhanced Soundproofing:** External noise was blocked, and sound clarity improved for professional recordings.
- **High NRC Performance:** The fabric's 0.95 NRC rating ensured minimal reverberation.
- **Compliance with Industry Standards:** The fire-rated fabric met all necessary safety regulations.

Client Feedback

The recording studio owner reported a significant improvement in sound isolation, allowing for crystal-clear recordings without external interference.
