

Design and Functionality of Acoustical Ceiling Baffles

Acoustical ceiling baffles not only improve sound quality but also add a modern aesthetic to any space. The **ANC-600** baffles from **All Noise Control** feature a clean, finished appearance with a unique “crisp” corner design, making them suitable for various applications, including:

- **Corporate Offices:** Enhance employee focus and productivity.
- **Educational Institutions:** Create conducive learning environments.
- **Healthcare Facilities:** Ensure patient comfort and privacy.
- **Retail Spaces:** Improve customer experience by reducing noise levels.

Additional Features:

- **Dual-Sided Absorption:** Enhances acoustic performance by absorbing sound from both sides.
 - **Lightweight and Easy to Install:** Can be easily suspended in various ceiling layouts.
 - **Customizable Sizes:** Available in various dimensions to fit different acoustic needs.
-
