OVERVIEW

The Bank of Cleveland required an elegant acoustic solution to improve privacy and sound control within customer service areas, meeting rooms, and open banking spaces. Conversations, foot traffic, and everyday operational noise created distractions that affected customer confidentiality and staff focus. To address these challenges without permanent construction, All Noise Control installed the ANC-17 Acoustic Curtain system, delivering decorative acoustic curtains designed specifically for professional, client-facing environments.

CHALLENGES

Open layouts and high customer volume generated background noise that interfered with confidential conversations and day-to-day operations. The Bank of Cleveland required noise reducing curtains that improved acoustic separation without compromising visibility, accessibility, or aesthetics.

SOLUTION:

All Noise Control installed ANC-17 acoustic curtains, custom-fabricated as decorative soundproofing curtains suitable for banking and corporate interiors. The system has sound insulating curtains to effectively manage airborne noise while preserving an open, professional atmosphere.

The ANC-17 sound isolation curtain system utilized sound resistant curtains to create flexible privacy zones around consultation desks and meeting areas.

RESULTS:

- Effective noise reduction using noise absorbing curtains
- Enhanced customer comfort and staff focus
- Refined interior aesthetics achieved with decorative acoustic curtains
- Cost-effective alternative to permanent walls using noise reducing curtains
