“Before the acoustic curtains were installed, noise from nearby classrooms and hallways was something we dealt with every day. It often distracted students and made it harder to keep everyone engaged during lectures and discussions.

All Noise Control installed the ANC-17 using decorative soundproof curtains that blended seamlessly within our classrooms. These effectively reduce the noise while keeping the space open and easy to navigate.

Since then, we can really notice the improvements. Classes feel calmer, voices carry more clearly, and students are able to focus better. It’s been a simple but effective improvement that really supports teaching and learning.”
