*“Between meetings, equipment, and general office activities, things could get pretty noisy at times. It wasn’t always easy to focus or hear conversations clearly.*

*After installing the ANC-17 Acoustic Curtains, the difference was really noticeable. The sound insulating curtains helped cut down on noise without making the office feel closed off.*

*Now the space feels calmer, conversations are easier to follow, and it’s just more comfortable to work in overall. It’s a simple change that’s made a big impact.”*
