“Before the soundproof curtain was installed, our area could get pretty noisy, especially when different teams were working close together. Conversations and activity easily carried across the space.

After adding the ANC-17 acoustic curtain, change was really noticeable. The soundproof and noise-filtering curtains helped cut down a lot of the background noise, but still our working space feels open and easy to work in. We didn’t lose visibility or access, which was very important for how we move around throughout the day.

Now communicating with my co-workers feels clearer, distractions are lower, and the workflow is smoother overall. ”
