*“In our industrial facility, doors to mechanical rooms and loading areas were letting a lot of noise through, making it hard for our staffs to focus and even creating safety concerns. We needed a solution that was effective but still flexible enough to install without shutting down our main operations.*

*All Noise Control’s ANC-AB2DC acoustic door blankets were perfect for us. They were easy to hang using grommets and hook-and-loop fasteners, and we can move them if layouts change. The acoustic door blankets have made a huge difference to our facility—reducing noise, improving privacy, and creating a quieter, safer environment for our team.”*
