“In our industrial facility, doors to mechanical rooms and loading areas were letting a lot of noise escape, making it hard for our team to focus. We needed something effective but flexible enough to install without shutting down our daily operations.

All Noise Control installed their ANC-AB2DC acoustic door blankets on our key doors, and the change was immediate. They were easy to hang with grommets and hook-and-loop fasteners, and we can move them whenever we need. These noise-reducing door blankets have made a big difference—our offices are quieter, staff can focus better, and the workspace feels safer.”
